

ColorSpan 9840uv

Start the new year out right! Resource Imaging Supply will have the ColorSpan® 9840uv printer on display in January 2007. This 98" wide, industrial-grade, high-speed, UV-curable flatbed & roll-fed printer is designed specifically for printing high quality graphics on inexpensive rigid and flexible roll materials. ColorSpan has created a production printer capable of producing extremely durable output for outdoor and indoor applications on media up to 98" wide and 2.75" thick, at speeds over 800ft²/hour! Their UV-pigmented inks offer an exceptionally wide color gamut, reproducing bright vivid colors with excellent adhesion on the widest range of substrates.

Digital Printing Lecture Series Flatbed 101 Presented by Dr. Nicholas Hellmuth, FLAAR

Thursday, January 18th

Dr. Nicholas Hellmuth, from FLAAR, will present an abstract lecture series on flatbed printing technology. This very limited engagement will be held on Thursday, January 18th. Along with detailed information on the ColorSpan 9840, the lecture will touch on the following key points:

- How do I select a printer?
- Solvent or UV-Curable?
- What technology is best?
- What can be printed on?
From boards and doors to glass and brick, does UV technology do it all?
- How does flatbed technology affect the bottom line?
