

A List of UV-Curable Flatbed Printer Applications

Together with
Everything you can Print with Flatbed
Printers, especially Architectural Uses

Metal piece printed on with an InkTec Jetrix UV flatbed printer at FESPA Munich 2010.

A complete plank of glass was printed on with the IP&I Cube 260 UV printer. Glass is especially popular in Asia.

This report has been moved

The report that you have downloaded was available last year. It is now being moved to our new section for people who wish to ask questions directly and personally to Dr Hellmuth. So all these reports you can receive when you either Subscribe, or sign up for consulting.

Due to the amount of new information regarding printing on glass, the lists of reports on this subject are being maintained for the [distributors](#), [printshop owners and managers](#), and [manufacturers](#) who write us for either a Subscription or for Consulting Services.

If you wish a Subscription, please look at www.FLAAR-Reports.org and then contact us at FrontDesk "at" FLAAR.org.

If you wish consulting services, download the consulting PDFs on any Consulting page on any FLAAR web site, or write us at FrontDesk "at" FLAAR.org
