

12 Colors, Fast, Wide-Format Print onto Silk, Cotton, Polyester

Yuhan-Kimberly

Production Textile Printers

The textile division of Yuhan-Kimberly (inks and printers) is undergoing a transition. All Yuhan-Kimberly inks, manufactured by Yuhan-Kimberly, are still available but the locus of manufacturing is in transition. Same with the manufacturing of the ink delivery and feeding mechanism of the otherwise Mutoh printers.

Thus we have temporarily withdrawn our evaluation until we know the situation of these printers for 2010 and into the future. It is essential that past, present, and future owners of this worthy ink and printer system be fully informed of the manufacturing and distribution network that stands behind any printer.

As soon as a new manufacturer is announced, and as soon as we can re-inspect the new models, we will consider updating the evaluation. It is also crucial to undertake evaluations of printers in-situ (in use by end-users in a printshop). When and if such inspections are possible, this would be an appropriate time to update our evaluations.

If you wish to obtain the original year 2008-2009 FLAAR Report on the Yuhan-Kimberly printer (before it went into "transition phase"), that original report has been moved to another area of our system (and updated with a notice about the transition). You can download this evaluation for FREE, just by filling out our www.wide-format-printers.net
