Please Note

We have moved this report to our textile inquiry form program.

If you are interested in inks for printing on fabrics, or textile printers or printing on wallpaper, you can fill out the form and receive this FLAAR Report on Hongsam textile ink and/or ink for wallpaper.

Contents

Printing on wallpaper is a topic of importance: 1

FLAAR is interested in all aspects of interior decoration 1

Wallpaper is best printed without solvent odor 2

Wallpaper may be better not printed with UV-cured ink 3

Yes, wallpaper can be printed with HP latex ink, but electricity expense is high 3

You can use disperse dye ink to print polyester as wall covering 4

What then is potentially better than all the above options? 4

Yes, wallpaper can be printed with HP latex ink, but electricity expense is high 5

You can use disperse dye ink to print polyester as wall covering 5

What then is potentially better than all the above options? 6

Colors available with JETALL inks: 6

To keep cost down, it helps if the wallcovering does not need to be coated 6

Printing on other materials, much more than wallpaper 6

General comments on JETALL inks 7

This is a first stage of a long-term evaluation 7
