

All Chinese-Made Printers that use Epson DX5 and DX6 printheads

Which were exhibited
at Guangzhou Sign China Expo 2011

Mireco, 3D substrate.

Front Cover: A-StarJet printers Epson DX7 heads.

This Report has been moved

The report that you have downloaded was available last year. It is now being moved to our new section for people who wish to ask questions directly and personally to Dr Hellmuth. So all these reports you can receive when you either Subscribe, or sign up for consulting.

There are so many new Epson DX5, DX7, and even DX6 printheaded printers coming out that we are focusing on maintaining all these lists for the [distributors](#), [printshop owners](#) and managers, and [manufacturers](#) who write us for either a Subscription or for Consulting Services. Plus we are updating our reports on Epson printheaded printers (obviously brands other than Epson, Mimaki, Mutoh, or Roland) for 2012.

If you wish a Subscription, please look at www.FLAAR-Reports.org and then contact us at FrontDesk "at" FLAAR.org.

If you wish consulting services, download the consulting PDFs on any Consulting page on any FLAAR web site, or write us at FrontDesk "at" FLAAR.org

Contents
